

V-RIBBED BELT WITH ADVANCED TECHNOLOGY.

ACDelco's new Advanced Technology belt incorporates EPDM rubber. EPDM rubber is used in OE belts and various rubber applications that require strength and durability like weather stripping and roofing materials while it also:

- / Stays soft and pliable longer than traditional belt materials limiting squealing and lengthening belt life
- / Resists penetration of water, acids and ozone
- / Is tolerant under a broad range of temperatures

Under a range of conditions, ACDelco Advanced Technology belts deliver:

- / Powerful grip
- / Reliable performance
- / Quieter operation
- / Longer life

The number one complaint with belts is noise caused by misalignment, slippage, lack of tension, belt wear and poor drive design. ACDelco Advanced Technology belts actually help limit noise from most causes with these features:

- / High modulus tensile cords help keep the belt tight and prevent stretching
- / Gumback construction improves backside wear

You can count on ACDelco belts to help provide quiet service and limit comebacks.

LIMITED LIFETIME WARRANTY
