## ACDelco Water Pump Offering

	Line	Usage	Warranty
OE	25	GM Only	12 months/12,000 miles
Professional Aftermarket	26	All Makes/All Models	12 months/12,000 miles

## ACDelco Professional Water Pumps

- Produced for just about every vehicle on the road today.
- Built with high quality, coated seals, a steel hub and have clearly visible quality inspection marks.
- Meet the latest vehicle manufacturer-specified designs.
- Use new cast-iron or die-cast aluminum housings.
- Feature permanently lubricated bearing and shaft assemblies.
- Manufactured using heat-treated, cast-iron or steel-stamped impellers.

### Tested to help ensure quality

- All-aluminum castings are pressure-tested for leaks prior to pump assembly.
- Additional leak testing on the assembly line helps eliminate the possibility of leakage or pump failure.

## Installation Tips

- Make sure the old gasket material is completely removed.
- It is critical to use the recommended torque specification and sequence. Refer to vehicle's service manual for more information.
- On a rear wheel drive vehicle, be wary of belt and fan imbalance. Look for excessive vibration and belt alignment when the engine is running.
