

MDI 2 – GDS 2 – LAPTOP PROMOTION

MDI 2 is the Global Diagnostic Interface tool for both current and future GM vehicles. It performs Pass-Thru programming on all GM vehicles built since 1996. Along with the MDI 2 interface tool, the Global Diagnostic System 2 (GDS 2), is used on certain vehicles when communicating with and diagnosing vehicle on-board electrical systems. Bundle these two diagnostic tools together for one year with a PC and you have the best setup for using GM's diagnostic software and vehicle calibrations!

MORE ACCURATE TIMELY DIAGNOSTICS

The GDS 2 platform and software is required for use with all current and future GM Global Architecture vehicles. Independent repair shops may not have hardware and software that is compatible with GM system requirements.

Help provide a better customer experience by having the proper tools for servicing GM vehicles.

THREE OPTIONS

BUNDLE	CONTENT	CATALOG ITEM#	FULL PRICE	REDUCED PRICE	SAVINGS
1	MDI 2, One year access to GDS 2	EL52100-AM2	\$1,325	\$1,200	\$125
