ACDelco Adds 52 New Oil Filters to Professional Line

GRAND BLANC, Mich. – ACDelco is adding 52 new part numbers to its Professional oil filter line. The expansion includes new part numbers for many popular import vehicles from Audi, BMW, Jaguar, Land Rover, Mercedes-Benz, Volkswagen and other manufacturers.

ACDelco oil filters are designed for peak performance, with cellulose media that traps particles as small as one-third the width of a human hair. Manufactured to rigorous quality standards, ACDelco oil filters deliver:

- Outstanding filtering capability – ACDelco oil filters trap 98 percent of particles larger than 30 microns
- Dependable performance – ACDelco oil filters are manufactured with ultra strong bonds to keep filtering media in place. Many models also include thermal set seals and ultrasonic, thermally bonded welds
- Coverage for 98 percent of vehicles on the road today.

Because ACDelco Professional and OE filters are backed by a 12-month/12,000-mile warranty, technicians can recommend them with confidence.

To learn more about the expanded line of ACDelco oil filters, contact your local ACDelco representative or visit ACDelco.com.

***ACDelco** is the exclusive Original Equipment parts brand for Chevrolet, Buick, GMC and Cadillac, as well as provider of premium aftermarket parts for most other makes and models. Other available applications include off-road, marine and industrial. With a century of history behind it and nearly 90,000 parts across 37 product lines, ACDelco is the preferred choice of professional technicians and do-it-yourselfers in more than 100 countries. To find an ACDelco Professional Service Center program participant or parts retailer, visit acdelco.com or call 1-800-ACDELCO. Find ACDelco on Facebook, YouTube, Instagram, Google+ and Twitter.*
